Features:

- Powder coated steel bed frame
- Durable steel lying surface
- Super low height of 10.2cm will drastically reduce the impact of any fall
- Maximum bed height of 70cm allows caregiver to have easy access to provide caregiving tasks like wound dressing, changing of diapers, feeding, rehabilitative therapy, etc.
- Full side rails with no gaps
- Padding along the top bar ensures the user is fully protected
- No vertical bars or gaps for user's leg to be caught in between. The space-in-between the side rail is covered by cotton mesh for safety enhancement
- A good side rail height of 54cm to prevent user from climbing out of the bed
- Mattress included
